

CASE PACKING

AZ Tete Beche

The AZ 78 packer “Tête Bêche” is an ideal machine for placing bottles by cartesian movement vertically or lying down in standard RSC cartons. For both solutions the automatic introduction of dividers be it carton separators, between the vertically placed bottles or flat card separator between one layer and another for the lay-down bottles.

AZ Tete Beche

Production	up to 10 cycles/min in relation to product type
Installed power	9 KW
Air consumption	200 NI/min
