

## ROBOT

# FLEXIPAL

Anthropomorphic robot with 4 or 6 axis mounted on secure large base with personalised pick-up equipment used for: cartoning or palletising a range of products such as: cartons, shrink-packs, bags, plastic containers, trays, bottles, plastic or paper layer separator cards or wooden or plastic pallets. The robot can be used for handling several lines at the same time with a high speed and precision, taking a single unit or a full layer and depositing them in a pre-programmed position.

# FLEXIPAL

## FLEXIPAL

- Movements: 4 or 6 axis
- Lines: up to four lines at the same time
- Payload: up to 600 Kg
- Infeed/pick-up pallets: automatic with recovery of empty pallets or manually
- Power: 15 Kw variable    Air consumption: 360NI/min variable
- Production: up to 15 cycles/min
