

## PALLETISING

---

# MAXIPAL

Reliable automatic “sweep” palletiser for cartons or shrink-packs (version SV for bags) with a high production rate. The machine is composed of a double column portal structure, mobile carriage 2-speed product distancing belt, layer preparation table with high level return pusher bar, intermediate accumulation table, pallet magazine and full/empty pallet roller conveyors.

# MAXIPAL

## MAXIPAL - CARTONS
