

CASE PACKING

ROBOMAX 80

Two axis robot which represents the most innovative solution in cartoning bottles, plastic containers or cans at a high speed. The robot takes and deposits up to 80kg of product from different points per cycle. Normally fitted with multiple two-axis adjustable pick-up heads, it offers the maximum flexibility in managing multiple cartons at the same time.

ROBOMAX 80

ROBOMAX 80

- 2 axis mechanical cartoning robot
